

## 15\_24 Temporary Shoring on Roadway Plans

### Question:

According to the Jan 17, 2007 memo Temporary Shoring on page 2 item 2, we are having to show temp shoring limits on our roadway plans. Is there a particular level or line style it needs to be placed on?

### Answer:

Some users have been placing it on Old\_Level\_1 but we recently created a a "shoring" folder in the "payitem" DDB to aid in the placing of the temporary shoring. Note: For x-sections you will need to use lvnname= Prop XS Temporary Shoring.
